Kidney Health for All

Brussels, March 12, 2015 – On Thursday March 12th we are celebrating the 10th Anniversary of World Kidney Day (WKD), the most widely celebrated event focused on kidney health across the globe. WKD is jointly organized by the International Society of Nephrology (ISN) and the International Federation of Kidney Foundations (IFKF). This year’s theme “Kidney Health for All” reminds us that not all of us are equal with regards to risk for kidney disease and access to treatment.

With 10% of the population worldwide having some form of kidney damage, there is a long road ahead to raise awareness about the dangers of kidney disease. Chronic Kidney Disease (CKD), which is predicted to increase by 17% over the next decade, is now recognized by WHO and other organizations as a global public health issue.

Some communities in both higher and lower income countries are at greater risk than others because of their ethnic origin, socioeconomic status and/or where they live. This has major public health implications because of the extremely high costs of renal replacement therapy. African, American Indian, Hispanic, Asian or Aboriginal populations are known to suffer from higher rates of diabetes and high blood pressure which are both leading causes for Chronic Kidney Disease (CKD). These populations are therefore at higher risk of developing severe renal disease and ultimately kidney failure. As an example, in the US, African Americans are 3 times more likely to experience kidney failure. Compared with Caucasians, African Americans have a much higher average blood pressure, develop hypertension earlier in life and have greater risks of complications such as CKD, stroke and heart disease.

Compared with Caucasians, African Americans have a much higher average blood pressure, develop hypertension earlier in life and have greater risks of complications such as CKD, stroke and heart disease.
In addition, there are a number of key issues and challenges in tackling Chronic Kidney Disease in vulnerable populations: poor water hygiene, lack of hydration, unhealthy choice of food and beverages, language barriers, education and literacy levels, low income, unemployment, lack of adequate health insurance, and certain culture-specific health beliefs and practices – just to name a few.

On World Kidney Day, drink a glass of water and give one too – There are many ways to show your support to the kidney cause: on March 12, 2015 we invite the whole civil society, governments, health professionals and patients to drink to their kidneys and to give a glass of water to their families, friends and co-worker. This is both a symbolic gesture and a conversation starter to raise awareness about the risks, dangers and burden of kidney disease and how to prevent and treat it in a simple manner across the globe—hopefully making people more conscious about their lifestyle choices.

The WKD Steering Committee ISN Co-chair, Dr. Philip Li is calling on the whole kidney community and beyond to get involved in this global celebration day: “Sharing a glass of water on March 12 is a good way to remind us that kidneys are vital organs and that they should be taken care of, wherever you live and whether you’re at risk or not. Taking steps to live a healthy lifestyle clearly helps to reduce risk, and early detection and treatment can slow or prevent the progression of kidney disease.”
Water may protect your kidneys, however there is no scientific evidence that drinking water lowers the risk for CKD.

شرب الماء قد يحمي كليتك، بالرغم من عدم وجود دليل علمي قوي على أن شرب الماء يقلل فعليا من خطر الإصابة بمرض الكلى المزمن!

A Growing Global Online Campaign– We are building on last year’s outstanding results to encourage our kidney community to show their support online and engage in the fight against CKD. For more information and details of events around the globe in celebration of World Kidney Day – please see www.worldkidneyday.org

الحملة العالمية المنتظمة على الإنترنت: نحن نبني على النتائج الباهرة في العام الماضي لتشجيع المجتمعات التي لها علاقة بالكلى لدينا للاظهار دعمهم على الإنترنت والانخراط في مكافحة مرض الكلى المزمن. لمزيد من المعلومات وتفاصيل الأحداث في جميع أنحاء العالم في الاحتفال باليوم العالمي للكلى – يرجى زيارة: www.worldkidneyday.org

Participants can send us messages and their pictures, using the #glassofwater and #isupportwkd.

 ويمكن للمشاركين أن يرسلوا الينا رسائل وصورهم، وذلك باستخدام الهاشتاج: #glassofwater and #isupportwkd.

About the organizers of World Kidney Day:

منظمات اليوم العالمي للكلى

World Kidney Day is a joint initiative of the International Society of Nephrology (ISN) and the International Federation of Kidney Foundations (IFKF).

اليوم العالمي للكلى هو مبادرة مشتركة للجمعية الدولية لأمراض الكلى والاتحاد الدولي للمؤسسات الكلى.

Founded in 1960, ISN is a global not-for-profit society dedicated to improving kidney care and reducing the incidence and impact of kidney disease worldwide. Through its global network and programs, ISN brings together the developing and developed worlds in a collaborative effort in fighting and treating kidney disease on a global scale.

تأسست في عام 1960 جماعة العالم للكلية هي جمعية عالمية لا تهدف للربح مكرسة لتحسين الرعاية بالكلى والحد من انتشار وتأثير أمراض الكلى على مستوى العالم. من خلال برامجها وشبكتها العالمية، الجمعية الدولية لأمراض الكلى تجمع العالم اليومي والمتقدم ويثود تعاوني لمحاربة وعلاج أمراض الكلى على نطاق عالمي.
