World Kidney Day 2023 is all about **"Kidney Health for All - Preparing for the unexpected, supporting the vulnerable"**.

Specifically, the goal is to raise awareness about disastrous events, natural or man-made, international or local, and their impact on people living with kidney disease whose access to appropriate diagnostic services, treatment, and care may be hindered.

World Kidney Day calls for the whole of society, including policymakers, health care services, governments, industry, as well as people living with kidney disease and their carers, to prepare for unexpected events to avoid any disruption in access to diagnosis, treatment, and care!
