

WKD 2021 Report

Name: Dr. Fan Fan Hou

Organization name:

Country: China

Number of events organized/collected in your country: 150

Activities of note (please give a brief description of the activity with links to online sources that mentioned it):

March 11th, 2021 is the 16th World Kidney Day, themed as "living well with kidney disease". Dr. Fan Fan Hou, a council member of the ISN and chair of the ISN North and East Asia Region, called on Chinese nephrologists to join the ISN initiative and organize themed activities to increase the education and awareness about effective symptom management and to help patients living well with kidney disease.

On the 2021 World Kidney Day, Chinese nephrologists in 74 hospitals across 15 provinces and municipalities have organized over 150 activities, including free consultations in 48 hospitals, online and offline patient education (77 seminars and patients gatherings), health science popularizations on newspaper and TV (5 interviews), and patient education in communities (2 activities), etc. Through these events, we hope to help patients better understand disease and treatment, to provide them with more effective and integrated treatment for symptoms, such as pain, anemia and bone damage, to improve the quality of their lives, and to encourage patients to actively participate in the management of their disease. The ultimate goal is to help patients to live well with kidney disease and return to life and society. Hundreds of patients got free consultations and over a million audience benefit from online and offline education seminars.
