

WKD 2021 Report

Name: Najib Abdulbari Algorafee

Organization name: Al Shafaqa Institution for care renal failure and cancer patients

Country: Yemen

Number of events organized/collected in your country:+967777772455

Activities of note (please give a brief description of the activity with links to online sources that mentioned it): attached document

List of media that published WKD press releases or mentioned WKD related activities (newspapers, magazines, online publications, TV, radio, etc..) – please provide link to online sources:

If you have created a World Kidney Day local website, Facebook page or Instagram account, please provide analytics such as: number of followers/number of site visits in March/ content most requested/ page views/ posts most liked/ hashtag reach, etc....

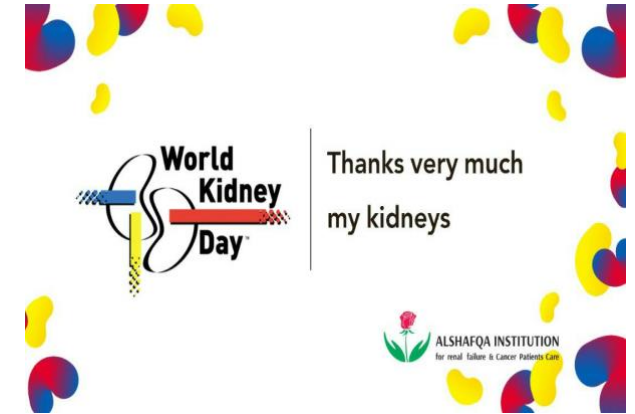

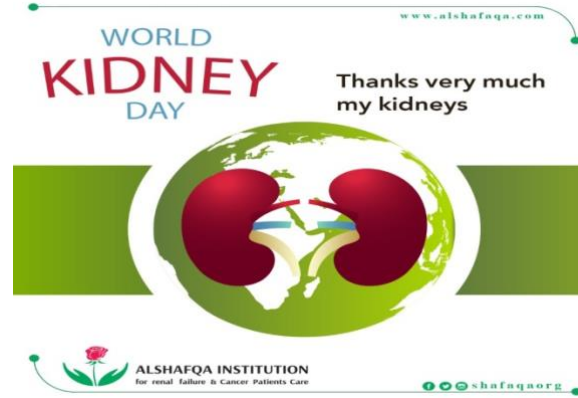

List of celebrities involved and short description of their involvement

Description of advocacy activities:

Attach representative pictures :

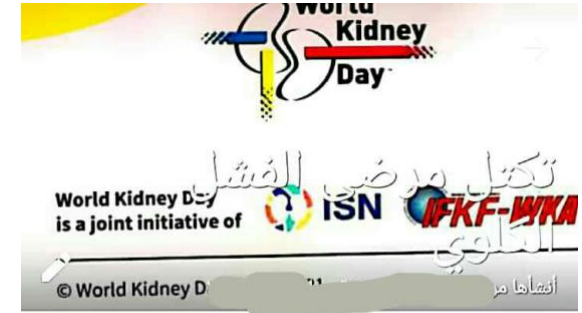

I attached our report

1- The online awareness campaign on social media and others about the importance of the kidneys, their role, how they work, how they fail, and how to preserve them .lasted for ten days

2- A phone number has been assigned to medical consultations, and a doctor has been assigned to answer patients' inquiries.

Establishing a WhatsApp group, patients with kidney failure, doctors, specialists, and those interested in the kidneys have been involved, and the exchange of information, advice, and how to live in good health with kidney disease.

تقيم مؤسسة الشفقة لرعاية مرضى الفشل الكلوي
والسرطان وبالتعاون مع جامعة اليمن والخليج
محاضرة توعوية عن:
كيفية العيش بشكل جيد مع مرض الكلى

مارس 2021 م

5- The mini scientific conference for consultants and doctors and coming up with recommendations to support kidney patients and updating policies in everything related to the kidneys and dialysis centers.

Launching SOS messages to support dialysis centers

In this regard, the SFCCRFP launched urgent distress calls, through which it appealed to humanitarian organizations and philanthropists, to expedite intervention to support and assist the dialysis centers in Yemen, which suffer from scarce capabilities, and lack of the requirements to carry out dialysis operations. In the forefront of which was the dialysis center in Al Saddah district, Ibb. The SFCCRFP stressed in its appeals the importance of the requirements of dialysis sessions that benefit hundreds of patients in various provinces of the Republic.

The 2nd Conference on Kidney Failure Patients

Difficult conditions afflicting kidney failure patients in Yemen, exacerbated by the continuous wars, which led to the awesome deterioration in the health situation as a whole. It contributed to the increase that brought the number of kidney failure patients to more than 50,000 due to a set of causes and problems prevailing in Yemen. Of these, the most significant are:

- Decreasing official expenditures in the health field in general.

- Lack of specialized health centers to conduct dialysis operations in most provinces.
- About 10 washing centers have stopped.
- Ten devices used in dialysis centers of provinces became out of service.
- Decreased solutions, drugs and medical supplies needed by dialysis centers.
- Random use of inappropriate medications, especially sedatives.
- Eating food and fruit treated with toxins and pesticides.
- Added to that are the burdens of

living endured by the poor kidney failure patients forced to leave their villages and areas to live in the cities and provinces that have dialysis centers.

To alleviate this tragedy and contribute to saving the lives of many KFPs, the SFCCRFP, in partnership with the Republican Hospital Authority in Sana'a, and in conjunction with the International Day for KFPs, held the 2nd conference of kidney failure on March 28, 2019 under the slogan: (Together to reduce Risks of Kidney Failure Disease).

Conference recommendations

Advocate the reactivation of the Kidney Transplant Center at the Revolution General Hospital Authority in the Capital Trust. Make the necessary efforts to restart the government dialysis centers, which have ceased to function in some provinces.

Advocate action to increase the dialysis centers, to cover all provincial capitals in Yemen.

Develop strategic plans to raise the capacity of dialysis centers, and work to increase the dialysis machines in these centers.

Provide solutions and filters for dialysis, and accompanying drugs in all kidney dialysis centers at the level of the Republic.

The conference calls on all humanitarian organizations to adopt an annual allocation in their financial budgets for the provision of free medicines and dialysis session tools for kidney failure patients and transplantation.

Take into account the conditions of patients with kidney failure, and give them an appropriate reduction rate, by consultants of kidney and urologists, laboratories, diagnostic centers, and private hospitals.

Take into consideration the conditions of patients with kidney failure, by financial

and businesspersons, civil society organizations, charitable humanitarian institutions, and provide food support guarantees, permanently or periodically.

Official and private media organizations play their role in raising awareness on the disease, its causes, risks and ways of prevention.

Fulfillment of the duty of civil society organizations, local and international humanitarian organizations, towards patients with kidney failure, provide more projects, programs, activities of support, necessary protection, awareness and educational activities.

The Conference played a wide amazing role in raising the alarm and call for strengthening efforts in the fight against kidney failure and raising awareness of its dangers and damages. The conference was held with the participation of key and co- sponsors.

Conference Outputs

- Increasing level of networking and coordination with official bodies and civil society organizations, in order to reduce the suffering of patients experiencing health, social and psychological diseases.
- Providing 1,600 sessions of dialysis cases for patients, necessary medicines, medical requirements and equipment to operate the dialysis centers.
- Draw the attention of official bodies, local and international organizations, companies, institutions and persons of society to the cluster of KFPs in Yemen, and the need to provide possible solutions to the dialysis centers stalled due to lack of necessary devices, solutions and medicines.
- Educating community members about the damages, risks and causes of kidney failure, its serious repercussions on the individual, family and society, ways to prevent it, and motivating the bodies and organizations that are interested in treating patients with kidney failure, and encouraging persons and philanthropists to provide the necessary support to kidney failure patients in Yemen.

6- An entertainment trip for children and people with kidney cancer

7- Because patients with kidney failure are the most vulnerable groups to Covid 19, personal protection and hygiene kits have been distributed to patients with kidney failure, in partnership with the Yemeni Red Crescent.

Logo of the Yemeni Red Crescent Society (جمعية الهلال الأحمر اليمني) and the National Society for Kidney Diseases (مؤسسة الشفقة لرعاية مرضى الفشل الكلوي). The banner features the text: **بمناسبة اليوم العالمي للكلى** (On the occasion of World Kidney Day), **تقيم مؤسسة الشفقة لرعاية مرضى الفشل الكلوي** (Organized by the National Society for Kidney Diseases), **والسرطان وبالشراكة مع جمعية الهلال الأحمر اليمني** (and cancer in partnership with the Yemeni Red Crescent Society), **مشروع توزيع مستلزمات الوقاية الشخصية** (Personal protection kits distribution project), **لمرضى الفشل الكلوي** (for kidney failure patients). It also includes the **World Kidney Day** logo and the date **صنعا - مارس 2021 م** (Sana'a - March 2021).

names of the participants in the activities of the World Kidney Day, including consultants, doctors, and civil society organizations.
