Bridge the  
knowledge gap  
to better  
kidney care.

World Kidney Day  
is a joint initiative of  ISN  IFKF-WKA

WKD'22 is the year of “Kidney Health for All”. Specifically, it calls on all of us to work to bridge the knowledge gaps to better kidney care. The 2022 campaign will focus on efforts to increase education and awareness about kidney health and on reducing the stubbornly high CKD knowledge gap.

This knowledge gap hampers the fight for kidney health and increases the inherent morbidity and mortality associated with kidney disease. All worldwide should not only be aware of the vital role played by the kidneys but know their own kidney health measures. Such a commitment to advancing knowledge of our kidneys involves all of us in the global kidney community — physicians, scientists, nurses and other health-care providers, patients, administrators, health-policy experts, government officials, nephrology organizations, and foundations.
