World Kidney Day is a joint

International Federation
of Kidney Foundations

initiative

www.worldkidneyday.org

This year, World Kidney Day sets out to raise awareness of the high and increasing burden of kidney disease worldwide and the need for strategies for kidney disease prevention and management.

850 million people worldwide are now estimated to have kidney diseases from various causes. Yet, barriers to available, accessible, adequate and quality kidney care persist.

We can change this, but only with your help!
