Description of advocacy activities:

Blood pressure was measured for all employee of the organization for awareness and early screening of CKD risk factor. The participants included all healthcare professionals including doctors, Nurses, administrative supporting staff, housekeeping and supervisor staff etc. On the occasion of WKD we measured blood pressure of 228 candidates (115 female). Out of 228 participants 12 were hypertensive, 6 were Diabetic and 16 had history of smoking. We found 35 cases (15.4%) of newly diagnosed hypertension having high blood pressure ($\geq 140/90$).
